

Road Report

7/02/25

Mill Creek is completed and under budget. Grading was completed at the same time. We should be able to roll forward about \$10,000 for future work.

We have to replace the culvert at Deer Run/Antelope later this summer or early fall..Through local contacts we were able to obtain a 30' section so we will only need to buy about 20' more at approximately \$200. Jim King will volunteer his backhoe for the installation.

Once we get some more moisture, we will drag the roads that need washboard work, primarily the entrance. Thanks to Tim who usually does this. Driving the 15 mph speed limit helps reduce the washboards significantly.

Next year will probably be a grading/maintenance period but that decision will be made after we see the results of winter on the roads.
